

**Frape Behr,
Barcelona**

Belgrade, 28 december, 2007

For more than a month now, the workers of Frape Behr factory, are struggling for their rights. They are doing this in protest against your company's outrageous plans that would include the release of 295 workers.

International Workers Association demands that the company, and the Catalan government, immediately give up on these plans and layoffs. Until the demands of our comrades are met the IWA and its Sections and Friends will organize campaigns and actions of international solidarity with the workers of your company.
